910 MARBLE CLEANER

1. PRODUCT DATA

Date of Preparation: March 1, 2015

Product Name: 910 Marble Cleaner

Producer: Diedrich Technologies, A Hohmann & Barnard Company, 310 Wayto Road, Schenectady, NY 12303

Company Contact: Ken Eglin

Telephone: 800-283-3888 **Fax:** 518-357-9636

Email: KenE@h-b.com **Web:** www.diedrichtechnologies.com

This product is manufactured for Commercial/Industrial use. Not recommended for: Household use.

2. PRODUCT DESCRIPTION

DIEDRICH 910 Marble Cleaner is an acid-based cleaner for use on old and new NON-POLISHED marble. **DO NOT USE ON POLISHED MARBLE.** 910 Marble Cleaner will remove iron stains, oil and scum, grease, and other atmospheric carbon dirt stains. 910 Marble Cleaner cleans and brightens marble surfaces.

3. PRECAUTIONS:

Personnel: 910 Marble Cleaner contains an acidic base and should be handled with care. All workers must be protected with complete body coverage by rubber or polyethylene suits, boots, gloves, face shield and protective headgear. Avoid contact with eyes and skin. Any exposed skin should be covered with a liberal coating of vaseline. Use with adequate ventilation. If used in confined area the use of a respirator with the appropriate filter may be required. When product is to be used on an occupied building, close all windows and cover air intakes and exterior air conditioning vents. Also shut down air handling equipment during application and for 30 minutes following. Avoid wind drift as it may injure passersby or damage vehicles.

**KEEP OUT OF THE REACH OF
CHILDREN AND ANIMALS.**

Safety lines and suspended scaffolding must be equipped with steel or synthetic fiber ropes. Use only plastic pumps and utensils. **Do not add to or mix with other chemicals or cleaners.** Caution should be exercised to confine the material to the surfaces being treated.

THOROUGHLY TEST SURFACES BEFORE CLEANING.

Interior Use: All metal fixtures in interior should be removed or plastic cover protected as they will be damaged by chemical fumes.

Adjacent Areas: Protect vegetation, metal and painted surfaces, electrical, anodized aluminum, asphalt roofing, cars and all other adjacent items with proper precautions, plastic coverings, and by soaking with water.

4. TEST AREA:

A test patch MUST be cleaned prior to full scale cleaning.

The test patch is necessary to determine compatibility and required end results. Individual surface types must be tested. Inspection of the test areas should occur after the surface has thoroughly dried. The test patch should be available for inspection and approval, then remain as the standard for the project.

5. APPLICATION:

910 Marble Cleaner should be applied full strength to a pre-wetted surface. Application can best be applied with the DIEDRICH ACID EXPRESS APPLICATOR PUMP, an acid-resistant airless lowpressure sprayer, roller, a soft, densely fibered synthetic brush, or pump up sprayer. Allow 2 to 3 minute dwell time and rinse with fresh water. Application of rinse water should be with a pressure washer fitted with a 15°, 25° or 40° fan type tip for best results. Equipment providing 500 p.s.i. at 3 to 5 gallons per minute is recommended.

6. COVERAGE:

1 gallon of 910 Marble Cleaner full strength will clean approximately 100 - 300 sq. ft. per gallon. Area coverage can be increased with dilution.

7. AVAILABILITY:

Diedrich products are available through a network of over 2000 distributors and 2100 contractors located throughout the United States, Canada, Mexico and Europe.
